

Sweep Duo r-MicroCombi Pro

Double-sided mop made from up to 50% recycled material

Product Description

Sweep Duo r-MicroCombi Pro is a double-sided microfibre mop with a unique 3-D honeycomb pile structure that offers **high dirt pick-up capacity and adaptability to uneven surfaces**. It has integrated brush fibers and fringe construction for better cleaning of all floors.

Sweep Duo r-MicroCombi Pro is a symmetrical, low friction mop suitable for dry, damp and wet cleaning processes. It is designed to be used as a pre-prepared system in all areas with double-sided cleaning capacity of > 40m². It has unmatched durability – machine washable up to 1,000 times and has been awarded the Nordic Swan Ecolabel, which ensures it meets stringent environmental, quality and health standards.

Application

Sweep Duo r-MicroCombi Pro is a perfect solution for smooth and structured floors alike as the brush fibers perform a scrubbing action to loosen dirt and particles while the 3-D pile design offers higher dirt pick-up capacity and adaptability to surface height. Fringes collect and remove larger dirt particles including hair, dust and sand.

Advantages

- ✓ Microfibre dirt-removal power with additional fringe for increased loose dirt pick up
- ✓ Unique brush fiber, 3-D pile and fringe construction
- ✓ Made from up to 50% recycled material
- ✓ Up to 99.99% bacteria removal tested with *P.aeruginosa* & *S.aureus* on vinyl surfaces at a third party lab
- ✓ High durability up to 1,000 washes
- ✓ Awarded the Nordic Swan Ecolabel

- ✓ Recognized by ErgoCert as part of an ergonomic system when used with Sweep r-Frame and either the Telescopic Handle or r-Ergonomic Handle
- ✓ Colour coded tags and numbered finger loops for mop side indication with arrow for mopping direction
- ✓ Double-sided, cost effective, less mops to buy, wash and use

Washing recommendation

Recommended washing conditions: 60°C. Maximum washing temperature: 95°C. Avoid high alkalinity and strong bleaching activity (do not use chlorine bleach). Tumble dry at low heat.

How to use

Mop preparation in the washing machine:

- ✓ Take mops out of machine, fold them once or lay them flat with the finger loop on top and put them in the box
- ✓ Prepare mops by adding cleaning detergent in the last rinsing process

Manual mop preparation:

- ✓ Prepare the cleaning solution in a bucket
- ✓ Fold mops once or lay them flat with the finger loop on top, and put them in the box
- ✓ Put sieve on box and pour the cleaning solution evenly inside
- ✓ Let the solution distribute evenly into the mops

Continue with the cleaning process (pre-prepared method):

- ✓ Adjust telescopic handle to correct height
- ✓ Start mopping in guided cleaning direction (closed mop side)
- ✓ After use, take away loose dirt particles by brushing the mop
- ✓ Wash the mops
